PROFILE

Back-End Developer with **3+ years** of experience (2+ years focused on backend development), specializing in building scalable RESTful APIs with **ASP.NET Core**, **EF Core**, and **PostgreSQL** following Clean Architecture principles. Proven track record delivering multi-tenant SaaS ERP systems (POS, Accounting, Warehouse, HR) serving **500+ tenant businesses**, with hands-on experience optimizing databases (SQL Server, MongoDB, PostgreSQL) and improving API performance by up to **60%**.

EXPERIENCE

Back-End Developer, Ultimate Solutions

06/2024 – Present

Legacy FERP — ERP System | ASP.NET MVC & AngularJS

- Maintained and extended a production ERP system built with ASP.NET MVC on .NET Framework 4.6, AngularJS, and SQL Server across Sales, Warehouse, Accounting, and HR modules.
- Developed business screens and workflows, enhanced backend business logic, and optimized SQL Server queries and database operations.
- Built and customized operational reports using Stimulsoft to support business reporting requirements.
- Investigated and resolved complex production issues affecting core business processes.

POSFerp — Point of Sale Backend

- Developed and maintained a POS backend using ASP.NET Core 6 Web API and MongoDB, supporting **500+ tenant businesses** in production.
- Designed RESTful APIs for POS workflows and Flutter mobile integration, improving transactional data processing.
- Reduced API response times by approximately **60%** through query optimization, indexing, and data-access tuning.
- Diagnosed and resolved critical production issues affecting live transactions, improving system stability and reliability.

FERP V2 — SaaS Multi-Tenant ERP Platform | Planned Project

- Planned scope includes POS, Sales, Accounting, Warehouse, and HR modules within a unified SaaS platform.
- Proposed backend stack includes ASP.NET Core, EF Core, and PostgreSQL, following Clean Architecture.
- Planned architecture includes tenant data isolation, RESTful APIs, DTOs, Unit of Work, and FluentValidation.
- Proposed RabbitMQ integration supports asynchronous communication between modules and automated Sales-to-Warehouse stock updates.

Technical Support Engineer, Ultimate Solutions

07/2022 – 05/2024

- Conducted comprehensive manual testing of application logic and database operations to identify bugs and ensure system reliability.
- Installed, configured, and deployed web applications via IIS; set up and tuned SQL Server and MongoDB environments for performance and security.
- Diagnosed and resolved database-related issues, maintaining data integrity and improving system uptime.
- Customized client-specific reports using Stimulsoft Report Editor, improving business reporting workflows.
- Delivered technical consultation and onboarding support, guiding clients through system functionality and best practices.
- Collaborated with cross-functional teams to troubleshoot complex issues and incorporate user feedback into future enhancements.

ADDITIONAL PROJECTS

DesCliniques — Multi-Tenant SaaS Clinic Management Platform

- Built a SaaS clinic management system enabling doctors to manage patient records, appointments, consultations, and sub-user access permissions.
- Developed backend APIs using ASP.NET Core Web API, EF Core, and PostgreSQL, applying Repository Pattern and Unit of Work for maintainable code.
- Used LINQ for complex querying and Mapster for efficient object mapping across data layers.

FERP ERP System — Multi-Module Restaurant ERP

- Built a multi-module ERP (Sales, Accounting, Warehouse, Purchase, HR, POS) using ASP.NET Core Web API, EF Core, PostgreSQL, and Stimulsoft.
- Applied Multi-Tenant support, Clean Architecture, Repository Pattern with Unit of Work, AutoMapper, and FluentValidation.

SurveyBasket API — Dynamic Polling & Questionnaire System

- Built an API enabling users to create and manage surveys, questions, and responses using EF Core, PostgreSQL, LINQ, Mapster, and FluentValidation.

CRUD System API — Restaurant Operations Management

- Developed a backend API for restaurant menu, orders, and analytics using ASP.NET Core, EF Core, PostgreSQL, and Swagger/Postman.

TECHNICAL SKILLS

Languages & Core: C#, OOP, JavaScript, HTML, CSS, AngularJS

Frameworks: ASP.NET Core Web API, ASP.NET MVC, Entity Framework Core, gRPC

Databases: SQL Server, PostgreSQL, MongoDB

Architecture & Patterns: Clean Architecture, Repository Pattern, Unit of Work, DTOs, Multi-Tenant Architecture

Libraries & Tools: LINQ, AutoMapper, Mapster, FluentValidation, RabbitMQ, MassTransit, Background Jobs, Caching, Logging, CORS

Reporting & DevOps: Stimulsoft, IIS, Swagger/Postman, Linux, Git, Trello, Agile

EDUCATION

Bachelor of Science, Computer and Information Science

Menoufia University, Faculty of Computer and Information — 2016 – 2020 | Grade: Good

CERTIFICATES

- Open Source Web Development — ITI (July 15, 2019)
- Web Design — NTI (April 19, 2022)
- InnovEgypt Program

LANGUAGES

Arabic (Native) | English (Professional)
