

Mostafa Atef Mohamed

.Net Back End Developer

✉ mostafaatef6066@gmail.com ☎ 01022163403 📍 Nasr City, Cairo 🔗 LinkedIn 🐙 Github

Profile

Back-End Developer with 3+ years of experience in the tech industry, including 2+ years specializing in backend development and a strong technical support foundation. Skilled in building scalable RESTful APIs using **ASP.NET** ☑ **Core**, **EF Core**, and **PostgreSQL**, following Clean Architecture principles. Experienced in developing multi-tenant SaaS ERP systems (POS, Accounting, Warehouse, HR), optimizing databases (SQL Server, MongoDB), and delivering maintainable, high-performance backend solutions.

Projects

DesCliniques - Multi-Tenant SaaS Platform for Clinic Management

Developed Des Cliniques, a SaaS-based clinic management system designed to empower doctors in managing patient records, appointments, consultations, and access permissions for sub- users. Built robust backend APIs using ASP.NET Core Web API, Entity Framework Core, and PostgreSQL, applying Repository Pattern and Unit of Work for clean, maintainable code. utilized LINQ for complex querying, and Mapster for efficient object mapping, ensuring smooth data transformations between layers.

FERP ERP System, A multi-module ERP system for restaurants with Sales, Accounting, Warehouse, Purchase, HR, and POS modules. using Web Api, Entity Framework Core, PostgreSQL, Stimulsoft, IIS, AutoMapper, Fluent Validation, Multi-Tenant Support, Clean Architecture, Repository Pattern with Unit of Work

SurveyBasket API, A dynamic polling and questionnaire system that enables users to create and manage surveys, questions, and responses. using Web Api, Entity Framework Core, PostgreSQL, Stimulsoft, Linq, Mapster, Fluent Validation

CRUD System API

Developed a backend API for managing restaurant operations including menu, orders, and analytics. using ASP.NET ☑ Core, EF Core, PostgreSQL, LINQ, Swagger/Postman

Technical Skills

C# , OOP ,SQL Server , MongoDB , Postgre Sql , Linq , Entity Framework , Clean Architecture, Repository Pattern, Unit of Work, Fluent Validation , AutoMapper, Mappster,CORS ,Background Jobs,Logging,Caching ,Dot Net core web Api ,Dot Net Mvc,RESTful APIs, GRPC , RabbitMQ , Mass Transit ,JavaScript ,AngularJS,Html, Css , Agile , Trello ,Linux

Certificates

- Open Source Web Development, ITI
- Web Design, NTI

Language

- Arabic
- English

Education

Bachelor,
Faculty of Computer and Information, Menoufia University
2016 – 2020
Good

Experience

Back End Developer, Ultimate Solutions ☑
06/2024 – Present

Full Stack Developer – FERP (Legacy ERP System)

- Maintained and extended a live ERP system built with **ASP.NET** ☑ **MVC 4.6** and **AngularJS** across Sales, Warehouse, Accounting, and HR modules.
- Implemented new business screens and workflows, enhancing backend logic and SQL operations.
- Built and customized operational reports using **Stimulsoft** and resolved complex production issues impacting core business processes.

Back End Developer – POSFerp (Point of Sale System)

- Developed and enhanced a high-performance POS backend using **ASP.NET** ☑ **Core 6 Web API** and **MongoDB**.
- Designed RESTful APIs for real-time POS operations and Flutter mobile integration.
- Optimized transactional data handling and resolved critical production issues to improve system stability and performance.

Back End Developer - (Ferp V2)

06/2024 – Present

- Led backend development of **FERP V2**, a SaaS-based ERP system (POS, Sales, Accounting, Warehouse, HR).
- Built scalable RESTful APIs using **ASP.NET** ☑ **Core**, **EF Core**, and **PostgreSQL** following Clean Architecture.
- Implemented Multi-Tenant architecture and advanced backend patterns (DTOs, UoW, FluentValidation).
- Integrated **RabbitMQ** for inter-module communication and automated stock workflows.
- Managed deployment, reporting (Stimulsoft), performance optimization, and production support.

Technical Support Engineer, Ultimate Solutions

07/2022 – 05/2024

- Conducted comprehensive manual testing to assess system performance, identify bugs, and ensure the reliability and responsiveness of both application logic and database operations.
- Installed, configured, and deployed web applications using IIS, and set up SQL Server and MongoDB databases to optimize performance and ensure secure, scalable environments.
- Diagnosed and resolved database-related issues, maintaining data integrity, improving system uptime, and ensuring seamless user experiences.
- Customized and optimized client-specific reports using Stimulsoft Report Editor, delivering actionable insights and improving business reporting workflows.
- Delivered technical consultation, onboarding, and implementation support, effectively guiding clients through core system functionalities and usage best practices.
- Collaborated with cross-functional teams to enhance usability, troubleshoot complex issues, and incorporate user feedback into future system enhancements.
